Position Title:
Security Solutions Engineer

Location:
Northern New Jersey

Job Description:
CipherTechs Inc is seeking a qualified information security professional for a full-time position. The position's main focus will be to provide clients with consulting services, which include the design, implementation and support of various information security projects. Candidates with previous consulting experience and the ability to work both independently and as a part of a group are preferred. Previous experience with firewalls, network high-availability, VPN is necessary, as detailed below. This opportunity will offer great learning experiences and professional development through exposure to many diverse client environments and challenges. Plus, training and research will be provided and encouraged.

Requirements:
Candidates must be able to demonstrate, via discussion and references, his/her ability to successfully design, implement and support network and application security solutions in an enterprise environment.   Furthermore, detailed understanding of information security principles is required. Applicants have to be able to assess project needs and requirements and previous pre-sales experience is a plus. Close interaction with project management and sales staff will be required.

The following knowledge and experience is also sought:
1. Experience in information security focusing on deployment of firewalls & VPN solutions is required.
2. Knowledge and experience with design, implementation and support of Juniper product suite in an enterprise environment is required.
3. Thorough understanding of TCP/IP protocol suite is required.
4. Knowledge of UNIX and Windows Server operating environments are required.
5. Knowledge and experience with design, implementation and support of Check Point product suite in an enterprise environment is preferred.
6. Knowledge and experience with design, implementation and support of Bluecoat product suite in an enterprise environment is preferred.
7. Experience and understanding of network design and troubleshooting specificity as it applies to interoperability of firewall systems with the network.

8. Understanding of available redundancy solutions for firewalls and networks.
9. Knowledge of available Information Security resources, common security issues, risks and mitigation strategies.

Benefits:
Competitive salary depending on skills and experience. Performance based individual and group bonuses. 401k, medical and dental benefits.
